Latif Hidayat

Fullstack Web Developer · Remote Admin Support

Jakarta, Indonesia (GMT+7) · Open to remote side jobs (part-time / freelance) as developer or administrative support
latiefhdy@gmail.com · Portfolio: claude.ai/artifact/NB3v933EnK7N2n8uDmkXey

PROFESSIONAL SUMMARY

Fullstack web developer at the Directorate of ICT, Directorate General of Taxes (DJP), Indonesia, building back-office applications and APIs used across head office, regional and district tax offices since 2021. I work with Next.js, Go and Laravel, and own delivery end to end with Docker, CI/CD and OpenShift.

Before moving into IT, I spent over four years in tax and office administration, so I know the workflows I build for. Available for remote side jobs in web development or administrative support.

CORE SKILLS

Frontend	Next.js, React, TypeScript, Tailwind CSS, shadcn/ui, Radix UI, Flowbite React, TanStack Query and Table, Recharts, dnd-kit
Backend	Go (Fiber), PHP (Laravel), Python; REST APIs, Swagger/OpenAPI, SSO and session auth, BFF architecture
Data	PostgreSQL, SQL and database design, Redis caching, cursor pagination
Delivery	Git, GitLab, GitHub Actions, Docker, OpenShift, code review
UI/UX	Wireframes, user flows, reusable components, design-to-code from Figma
Administration	Excel (formulas, data cleanup, reporting), correspondence, record keeping, documentation
Languages	Indonesian (native), English (conversational)

EXPERIENCE

Application Developer, Directorate of ICT

Directorate General of Taxes (DJP), Ministry of Finance · Apr 2021 – Present

- Ship fullstack back-office applications used by DJP staff across head office, regional and district tax offices.
- Build REST APIs in Go and Laravel, including a public read-only API that feeds data to the new pajak.go.id portal.
- Build Next.js admin interfaces from Swagger specs: data tables, dashboards, approval workflows and PDF reports.
- Own delivery end to end, from Docker images and CI/CD pipelines to deployment on OpenShift (Kubernetes).
- Turn business users' requirements into working features, and write technical documentation and deployment guides for the team.
- **Rated 100–120% of application delivery target in every quarter of 2024**, with all performance targets met or exceeded.
- Qualified in 2023 as an internal trainer for DJP's Core Tax Administration System.

Staff, Directorate General of Taxes

Ministry of Finance · Dec 2016 – Apr 2021

- Handled tax and office administration: correspondence, records and regular reporting.
- Gained first-hand knowledge of the daily workflows I now build software for, then moved into application development in 2021.

SELECTED PROJECTS

Most of this work is internal to DJP, so there are no public links and descriptions stay at a general level.

pajak.go.id back office and page builder

2026 · Fullstack · Next.js, dnd-kit, BFF

Back office for the pajak.go.id website with a drag-and-drop page editor, layout presets, live preview, and login and menus through a BFF layer.

Public data API for pajak.go.id

2026 · Backend · Go (Fiber), PostgreSQL, Redis, Swagger

Read-only API serving tax volunteer and university Tax Center data to the public portal, built for high traffic with cursor pagination and two-layer caching.

Tax Control Framework assessment app

2026 · Frontend · Next.js, TanStack Query and Table, Recharts, React PDF

Platform for assessing taxpayer compliance with internal-control principles; built the assessment workflow, data tables, dashboards and PDF reports.

Megitra, a Git and Jira workspace

2026 · Solo project · Next.js, TypeScript, GitLab API, Jira API

One screen for developers to track GitLab contributions, run and monitor CI/CD pipelines, manage CI variables and handle Jira tickets.

Employee portal redesign and Tax Center back office

2026 · Frontend · Next.js, shadcn/ui, Zustand

Redesign of the main employee service portal (single sign-on, to-do list, tickets, favorites), plus a back office for Tax Center activities and reports.

Taxpayer assistance app

2026 · Frontend · Next.js, React Query, Radix UI, Docker, OpenShift

Search and assistance tool used by regional and district tax offices; built the interface from the API's Swagger spec and set up its container deployment.

Laravel workflow applications

2023 – 2026 · Fullstack · PHP, Laravel, SQL

Office bank account management and reconciliation, an SOP drafting and approval system, and a research permit application portal.

EDUCATION & TRAINING

Bachelor's Degree (S.Kom.), Information Systems

STMIK Jakarta STI&K · 2025

Diploma III, Informatics Management

STMIK Jakarta STI&K · 2024 · Final project: office supplies monitoring app

Diploma I

Politeknik Keuangan Negara STAN · 2016

Training

- .NET Core Programming — Ministry of Finance · 2024
- Trainer program, DJP Core Tax Administration System · 2023
